VIRTUALEXPERT.NET

The Social Content Client Kit

Install a brand voice guide, a monthly content plan, a week of posts from one piece of content, comment replies and a monthly report for a client

DENISE CULLOM

Before you start

Most small business owners know they should post more and never have time to. They don't need a social media strategy deck. They need someone to turn what they already say into posts that sound like them, every week, without it becoming a second job.

This kit gives you that system, ready to install in the client's own Claude or ChatGPT account, plus the pitch, numbers, intake, tests, handover and monthly care plan that make it a service you can sell. It's written for virtual assistants and works the same for any freelancer or marketer.

What this kit installs

Agent	What it does	Runs	Saves a month
Brand Voice Builder	Writes the client's voice guide from their own words	Once, then quarterly	One-time setup
Content Planner	Plans next month's posts by pillar and date	Monthly, the 25th	2.25 hrs · $122
Content Repurposing Agent	Turns one piece of content into a week of posts	Weekly, on demand	9 hrs · $486
Comment and Review Reply Agent	Drafts replies to comments, messages and reviews	Mon, Wed, Fri	4 hrs · $216
Monthly Content Report Agent	Turns platform stats into a one-page report	Monthly, the 2nd	1.5 hrs · $81

*Total for a typical small business: **about 17 hours and $905 a month**, with review time already subtracted. How the numbers are worked out is in Part 1.*

Who to sell it to

- **Coaches, consultants and service businesses** who create content (videos, podcasts, newsletters, talks) but never turn it into regular posts.
- **Owners who post in bursts** and then disappear for a month.
- **Clients you already post for by hand.** This cuts your writing time, so you can raise your rate or take on more clients.

What you need before you start

- **Your own paid Claude or ChatGPT account** to practice on. Build every agent once for yourself before you install it for a client.
- **The client on their own paid plan** (about $20 a month for one person). The agents, files and connections live in the client's account, not yours, so they keep working if you part ways and the client's data never sits in your account.
- **One source of content a week from the client.** A 10-minute voice memo is enough. If they make nothing, this kit becomes a writing job, so price it differently.

How to use this kit

1. **Part 1, Sell it:** the pitch, the savings worksheet, what to charge and a proposal email.
2. **Part 2, Intake:** the questions to ask, the access to request and the safety rules to agree in writing.
3. **Part 3, Install:** 5 agents, each with instructions to paste, files to collect, connections and a scheduled task.
4. **Part 4, Test:** the checks to run before the client sees anything.
5. **Part 5, Hand it over:** a client-facing guide and a 20-minute handover call.
6. **Part 6, Keep it running:** a weekly care checklist, a 30-day results report and what to sell next.

Every agent works in Claude or ChatGPT. Where the steps differ, both are shown. Fill in every [bracket] before you paste anything.

The one rule

Agents draft. People approve. Nothing is published, scheduled or replied to in public until the client (or you, if that's agreed) has read it. You can loosen this later for one agent at a time, once it has a clean record (Part 6 shows how).

Part 1: Sell it

The 30-second pitch

Script: The pitch

"You already say great things on calls and in your newsletter, they just never make it to LinkedIn. I can set up an AI system in your own account that learns how you write, plans a month of posts around your offers, and turns one video or newsletter a week into all your posts for the week, in your voice. You approve everything. It saves most owners eight to ten hours a month, and I look after it so it keeps getting better."

Work out their numbers

Clients buy time and money, not AI. Ask how long each job takes today, then fill in this worksheet with them on the call. The figures below are for a typical small business; replace them with the client's own.

Job	Minutes by hand	Minutes to review	Times a month	Rate	Saved a month
Plan next month's posts	180 a month	45 a month	1	$54	2.25 hrs · $122
Write a week of posts	180 a week	45 a week	4	$54	9 hrs · $486
Reply to comments and reviews	30 a session	10 a session	12	$54	4 hrs · $216
Monthly results report	120 a month	30 a month	1	$54	1.5 hrs · $81

$54 an hour is the cost of a marketing specialist: $37.87 median pay plus benefits. Rates are U.S. median pay from the Bureau of Labor Statistics (May 2025) divided by 0.70 to include benefits and payroll taxes. If the owner does the work themselves, their time is worth more, so use their number.

Savings math

Hours saved a month = (minutes by hand − minutes to review) × times a month ÷ 60

Monthly savings = hours saved × hourly rate

For this kit: about 17 hours and $905 a month. More consistent posting usually means more inquiries, but that isn't counted here

What to charge

Charge for the result and the risk you take off the client's plate, not your hours. A fixed setup fee plus a monthly care plan works best: the client knows the price up front, and you get paid to keep the agents improving.

	Suggested starting range	What it covers
Setup	$500 to $1,000	Voice guide, install of all five agents, the first month's calendar, testing, handover call
Monthly care	$250 to $500 a month	Weekly repurposing runs, comment replies three times a week, monthly report, updates
Smaller start	$300 to $450	Voice guide plus one month of repurposed posts, as a paid trial

These are starting points, not market rates. Set your own based on your experience, the client's size and how much the work saves them. A good test: the setup fee should pay for itself in under three months of savings.

The proposal email

Template: Proposal email

Subject: A month of posts in your voice: social content setup

Hi [first name],

Thanks for walking me through [the job, e.g., writing and planning your social posts]. From what you told me, it takes about [hours] hours a month, which costs roughly $[amount] at [rate].

Here's what I'd set up: a voice guide built from your own writing, and four AI agents in your own account that plan each month's posts around your offers, turn one piece of your content a week into all your posts, draft replies to comments and reviews, and write a one-page results report every month.

Setup: $[fee], one time. Done within [5 to 10] business days of getting access.
Monthly care: $[fee] a month. I check the agents every week, fix what needs fixing, update them as your business changes, and send you a short results report each month. Cancel any time with 30 days' notice.

Everything is built in your own [Claude / ChatGPT] account, so you own it. Nothing gets sent to anyone without a person approving it first.

If that works for you, reply "yes" and I'll send the invoice and a short intake form.

[Your name]

Part 2: Intake and access

Send the intake form as soon as the client says yes. Most installs that go wrong go wrong here: missing files, the wrong account or unclear rules.

Intake questionnaire

Send these as a form or a shared document. The first five are the same for every kit.

1. Which AI tool and plan do you use, or should we start one? (Claude Pro or ChatGPT Plus is enough to start.)
2. Which email, calendar and file storage do you use? (Gmail, Outlook, Google Drive, OneDrive, Dropbox.)
3. Who on your team will review what the agents draft, and how quickly can they usually do it?
4. Describe your business in two sentences: what you sell and who buys it.
5. Share three emails or posts you wrote that sound exactly like you.
6. Which platforms do you post on, and how often would you like to post on each?
7. What do you already make that we can repurpose (videos, podcasts, newsletters, talks, calls)? How often?
8. Share 10 to 20 of your best posts or emails, and a link to any video or podcast of you talking about your work.
9. What are your offers, and what dates are coming up (launches, events, promotions) in the next three months?
10. What topics are you known for, or want to be known for? What do you never post about?
11. Who approves posts before they go live, and how quickly?

Access checklist

Ask the client to invite you, never to send you their password. Where a tool allows it, get your own login with only the access you need.

- ☐ The client's AI account: a seat on their Team plan, or a screen-share session where they log in and you drive.
- ☐ A shared Drive or OneDrive folder for source content, the voice guide and monthly calendars.
- ☐ Access to each platform's analytics export, or a monthly screenshot from the client.
- ☐ A scheduling tool login if you'll be scheduling the approved posts (the agents only draft).
- ☐ A shared folder (Google Drive or OneDrive) called "AI agents" for the reference files in Part 3.
- ☐ A written yes to the safety rules below.

Safety rules to agree in writing

Put these in your proposal or send them as a short email and ask the client to reply "agreed." They protect the client and they protect you.

> **Template: Safety rules**
>
> 1. Agents draft; a named person approves before anything is sent, posted, paid or deleted.
> 2. The agents and their files live in [client]'s account. [VA name] can be removed at any time.
> 3. These are never pasted into an AI tool: passwords, full card or bank account numbers, Social Security or tax ID numbers, medical records, or anything a contract says to keep confidential.
> 4. Paid AI plans let you turn off use of your chats for training. We'll check that setting on day one.
> 5. No post, reply or message is published by an agent. The client approves anything about an unhappy customer.
> 6. Agents never invent client stories, testimonials, statistics or quotes.
>
> Agreed by [client name], [date].

Check the privacy setting on day one. In Claude, open **Settings** → **Privacy**; in ChatGPT, open **Settings** → **Data controls**. Turn off the option that lets the provider use chats to improve its models, if the client's plan shows one. Names of menus change often; if you can't find it, ask the assistant "Where do I turn off training on my chats?"

Part 3: Install

Every agent below is built from the same four parts: a **project** (one home for one job), **instructions** (its job description), **files** (its training binder) and, for recurring work, a **schedule**. Connected apps are the fifth part for agents that need them.

The build steps, once

In Claude: Projects → Create project → name it → paste the instructions under Instructions → upload the files → start a chat and give it one small real task. To schedule a task, type in any chat "Every weekday at 7:10am, do the following..." and approve the task Claude proposes, or create it from the Scheduled section.

In ChatGPT: New project → name it → paste the instructions in the project's settings → add the files → test it. To schedule, type "Every weekday at 7:10am, do the following..." and confirm the card, or use the Scheduled section. Two limits to plan for: Plus allows a handful of active scheduled tasks at once, and a scheduled task may not be able to read a project's uploaded files, so every task prompt in this kit is written to stand on its own.

Set scheduled times a few minutes past the hour (7:10, not 7:00) and run each task once by hand before you trust the schedule. Menus get renamed often; if a button isn't where this kit says, ask the assistant where it went.

Install order: Brand Voice Builder first; nothing else works without the voice guide. Then Content Repurposing (the biggest saver), then the Content Planner on the 25th, then Comment Replies and the Monthly Report.

Agent 1: Brand Voice Builder

Runs: Once, then quarterly · **Needs:** 10 to 20 samples of the client's writing or speech · **Install time:** 45 minutes

What it does: Reads the client's best posts, emails and transcripts and writes a one-page voice guide that every other agent in this kit uses. This is the step that makes the posts sound like the client instead of like AI.

1. Create a project called "Brand Voice Builder" in the client's account.

2. Paste these instructions:

> **Instructions: Brand Voice Builder**
>
> You study how [client name] at [business] writes and speaks, and write a voice guide other AI agents will follow.
>
> From the uploaded samples, write a one-page guide with: (1) **who we talk to** in two sentences; (2) **voice in five rules**, each with an example sentence from the samples; (3) **words and phrases we use**, and **words we never use**; (4) **how we open and close** a post; (5) **topics we're known for** (3 to 5 content pillars); (6) **things we never do** (e.g., no fake urgency, no emojis in the first line).
>
> Quote the samples; don't invent examples. Where the samples disagree, say so and ask which way to go.

3. Upload: 10 to 20 samples: the client's best posts, newsletters, emails to clients, and if possible a transcript of them talking about their work (a podcast, a webinar or a recorded call).

4. Connect: nothing.

Watch for: a guide full of generic adjectives ("professional, friendly"). Push for rules a stranger could follow: "short sentences, contractions, one question per post." Save the finished guide as a file called "Voice guide" and upload it to every other project in this kit.

Agent 2: Content Planner

Runs: Monthly, the 25th · **Needs:** the voice guide and the client's dates (launches, events, offers) · **Install time:** 30 minutes

What it does: Builds next month's content calendar: which pillar each post covers, the angle, the platform and the day, built around the client's offers and events.

1. Create a project called "Content Planner" in the client's account.

2. Paste these instructions:

> **Instructions: Content Planner**
>
> You plan the monthly social content calendar for [business]. Follow the voice guide and the content pillars in it.
>
> **Each month, produce a table** with Date, Platform, Pillar, Post idea (one line), Format (text, carousel, short video, photo) and Call to action. Post [3] times a week on [platforms].
>
> **Balance:** roughly [60]% helpful, [25]% behind the scenes or stories, [15]% offers. Put offer posts in the week before [launch or event dates from the dates file].
>
> Don't repeat an idea from the last two months' calendars (in the files). Don't plan around holidays or news events unless I list them.

3. Upload: the voice guide, a "Dates and offers" file the client updates (launches, events, promotions, closures), and each month's finished calendar as you go.

4. Connect: nothing required. If the client keeps a content calendar in Google Sheets, connect Drive so the agent can read last month's.

5. Put it on a schedule:

> **Scheduled task: Next month's calendar · Monthly, 25th, 9:10am**
>
> **Job:** Draft next month's social content calendar for [business]. **Read:** the voice guide, dates and offers, and last month's calendar in [Drive folder]. **Steps:** (1) Plan [3] posts a week on [platforms]. (2) Balance pillars: [mix]. (3) Put offer posts in the week before [dates]. (4) Avoid repeating last month's ideas. **Deliver:** a table with Date, Platform, Pillar, Idea, Format, Call to action. **Never** send, post, delete or change anything. If something you need is missing, say exactly what's missing and stop.

Watch for: calendars that ignore the client's real offers. Ask the client to update the Dates and offers file before the 25th each month; put a reminder in their calendar.

Agent 3: Content Repurposing Agent

Runs: Weekly, on demand · **Needs:** one piece of source content a week · **Install time:** 30 minutes

What it does: Takes one thing the client made (a video, podcast, newsletter, call transcript or long post) and turns it into the week's posts for each platform, in the client's voice.

1. Create a project called "Content Repurposing Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Content Repurposing Agent**
>
> You turn one piece of content into a week of posts for [business], following the voice guide exactly.
>
> From each source, produce: **[3] LinkedIn posts** (under 200 words, one idea each, hook in the first line) · **[3] Instagram or Facebook captions** (under 120 words) · **[2] short video scripts** (30 to 45 seconds: hook, three points, call to action) · **[1] email** (under 200 words, one link) · **[5] headline options**.
>
> Match each post to this week's calendar entries where you can. Use only ideas, stories and numbers from the source. Never invent a client story, a statistic or a quote.

3. Upload: the voice guide and 5 to 10 of the client's best-performing past posts.

4. Connect: nothing required. Connect Drive if the client drops source files into a folder.

Watch for: posts that read as AI: lists of three adjectives, "in today's fast-paced world," questions nobody asked. Add every phrase you cut to the "words we never use" list in the voice guide.

Agent 4: Comment and Review Reply Agent

Runs: Mon, Wed, Fri · **Needs:** comments and reviews pasted in, or exported · **Install time:** 30 minutes

What it does: Drafts replies to comments, direct messages and public reviews, so the client (or you) can respond in minutes and nothing sits unanswered for a week.

1. Create a project called "Comment and Review Reply Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Comment and Review Reply Agent**
>
> You draft replies to comments, messages and reviews for [business], following the voice guide.
>
> **For each item,** label it: Thanks, Question, Complaint, Sales lead or Spam. Then draft a reply under 50 words. Thank people by first name. Answer questions only from the FAQ file; if the answer isn't there, write [NEEDS ANSWER].
>
> **Complaints and bad reviews:** acknowledge, don't argue, offer to take it offline at [email]. Flag them at the top. **Sales leads:** draft a reply and flag them so [name] can follow up personally.
>
> Never offer a refund, discount or exception. Never mention a customer's purchase details in public.

3. Upload: the voice guide and the client's FAQ.

4. Connect: most social platforms don't connect directly. Copy new comments and reviews into the chat, or paste an export. You can do this as part of your care plan.

Watch for: replies to bad reviews. Read every one before it's posted, and have the client approve anything that mentions an unhappy customer.

Agent 5: Monthly Content Report Agent

Runs: Monthly, the 2nd · **Needs:** analytics exports from each platform · **Install time:** 20 minutes

What it does: Turns the client's platform stats into a one-page report: what worked, what didn't, and what to do more of next month, with every number taken from the exports.

1. Create a project called "Monthly Content Report Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Monthly Content Report Agent**
>
> You write the monthly content report for [business].
>
> From the uploaded analytics exports, report: (1) posts published per platform; (2) followers at month end and change; (3) the top 3 posts by engagement and why they likely worked (pillar, format, hook); (4) the bottom 3; (5) three specific recommendations for next month's calendar.
>
> Use only numbers from the exports. If a number is missing, say so. Keep it to one page, plain language, no jargon.

3. Upload: the voice guide (for pillar names) and each month's exports.

4. Connect: nothing. Download the analytics export from each platform (most have one in their insights or analytics section) and upload them.

Watch for: reasons stated as facts. The agent can suggest why a post worked; make sure the report says "likely," not "because." Feed its recommendations into the next month's Content Planner run.

Part 4: Test before handover

Run every test in the client's account, with their real data, before the handover call. Fix and re-run anything that fails. Keep this table: it goes in your 30-day report as proof the work was checked.

Test	How to run it	Pass if
Voice guide	Read the guide to the client on a call	They say "that's me" with only small changes
Blind test	Mix three agent drafts with three of the client's real past posts	The client can't reliably tell which are which
No invented facts	Check every number, story and quote in a week of drafts against the source	Everything traces back to the source
Bad review	Run one real negative review through the reply agent	Calm, short, moves it offline, offers nothing
Report numbers	Check five numbers in the report against the export	All five match
Missing information	Give an agent a task with one key fact left out	It says what's missing and stops instead of guessing
Nothing goes out	Check sent mail, posts and records after every test	Nothing was sent, posted, changed or deleted

If the same fix comes up twice, add a rule to that agent's instructions. Agents get better from written rules, not from being told off in a chat.

Part 5: Hand it over

The client guide

Copy this into a one-page document, fill it in and save it in the client's "AI agents" folder. It's the page they'll open when you're not there.

> **Client guide: Your social content agents**
>
> **What's running:** a Content Planner that drafts next month's calendar on the 25th, a Repurposing project that turns one piece of your content into the week's posts, a Reply project for comments and reviews, and a monthly report on the 2nd.
>
> **Your daily routine (about 30 minutes a week):** drop one piece of content (a video, a voice memo, a newsletter) into the shared folder by [day]. Approve or edit the week's posts by [day]. Approve the next month's calendar by the 28th. Glance at the monthly report.
>
> **What the agents will never do:** send, post, pay, delete or promise anything without a person approving it.
>
> **When something looks wrong:** don't fix it in the chat. Forward it to [VA name] at [email] with one line on what you expected. I'll update the instructions so it doesn't happen again.
>
> **To pause everything:** turn off the scheduled tasks under Scheduled in your AI account. Nothing else breaks.
>
> **Your monthly report** arrives on the [date] of each month with time saved, what changed and what's next.

The 20-minute handover call

Book it for the morning, when the first scheduled run has just landed, so you can walk through real output.

Minutes	What to do
0 to 3	Recap the problem in their numbers: "This was costing you about [hours] a month."
3 to 10	Open this morning's output together. Show where each agent's work lands and what to do with it.
10 to 15	Have the client approve, edit and send (or post) one item themselves while you watch.
15 to 18	Walk through the client guide: what never happens, what to do when something looks wrong, how to pause.
18 to 20	Agree the first check-in date and when the monthly report arrives.

After the call, send the client guide by email so it's in their inbox, not just their drive.

Part 6: Keep it running

Weekly care checklist (20 to 30 minutes per client)

- ☐ Every scheduled task ran this week. Open each one's history and look for skipped or failed runs.
- ☐ Connections are still signed in. Expired sign-ins are the most common reason an agent goes quiet.
- ☐ Compare what the client edited in this week's posts with the voice guide. Repeated edits become voice rules.
- ☐ Check the Dates and offers file is current before the 25th.
- ☐ Make sure no question or complaint has gone unanswered for more than two business days.
- ☐ Every fix the client or reviewer made twice this week is now a written rule in the instructions.
- ☐ Reference files are current (prices, policies, team list, dates).

The 30-day results report

Send this at day 30 and every month after. It's the single best way to keep a care plan: clients cancel what they can't see.

> **Prompt: Monthly results report**
>
> Write a one-page monthly results report for [client], whose social content agents I set up and maintain. Use a friendly, plain tone.
>
> Here's what happened this month: [paste counts, e.g., source pieces repurposed, posts drafted, posts published, replies drafted, top post and its engagement]. Here's what I changed or fixed: [list]. The client's time per task before was [minutes] and is now about [minutes].
>
> Include: (1) one headline sentence with hours and dollars saved this month, using a rate of $[rate]/hour; (2) a short table of each agent, what it handled and time saved; (3) what I improved; (4) one recommendation for next month, with its estimated savings. Don't invent numbers I didn't give you. Under 300 words.

Earn autonomy in stages

After a month of approvals with few edits, the client may let you schedule approved posts without a second look, or post thank-you replies to positive comments directly. Keep human approval for anything about complaints, prices or offers. Write the change into the instructions and the client guide, and agree it with the client by email first.

What to sell next

Social content brings inquiries, and inquiries fill the inbox. Sell the **Inbox & Calendar Kit** to handle the extra email, or the **Customer Support Kit** if the questions are from customers.

The other client kits

This kit is one of four Done-for-You Client Kits for VAs: **Inbox & Calendar**, **Social Content**, **Bookkeeping Prep** and **Customer Support**. Each one follows the same six parts, so once you've installed one, the next goes faster. Get the others at **virtualexpert.net/kits**.

Want a new client-ready workflow every month? The **AI VA Lab** membership adds one at the start of each month, with ten prompts and the client-facing templates to sell it: **virtualexpert.net/membership**.
