The AI-Ready VA Templates Pack

Agreements, audit forms, workflow cards, SOPs, proposals, pitch scripts and 40 prompts for running AI for your clients

DENISE CULLOM

How to use this pack

Every template here goes with a lesson in *The AI-Ready VA* course. Copy a template into your own document, replace every [bracket] with real details, and delete any line that doesn't fit the client.

Template	Use it in	What it's for
1. AI Use Agreement	Module 3	Agree the rules with a client before you connect AI to anything
2. Client Data Rules	Module 3	A one-page "never paste" list for you and the client's team
3. AI Opportunity Audit	Module 4	Interview the client and find the top three workflows
4. Workflow Card	Modules 5 and 6	Design and document every workflow on one page
5. Workflow SOP	Module 6	Tell the reviewer exactly how to run and check a workflow
6. Change Log	Module 6	Record every change to a workflow
7. Monthly AI Report	Module 6	Show the client what their AI saved this month
8. AI Services Menu	Module 7	Your three offers, written for clients
9. AI Setup Sprint Proposal	Module 7	Turn an audit into a signed project
10. Pitch Scripts	Module 7	Messages to offer AI services to current and new clients
11. Case Study	Modules 7 and 8	Turn every workflow into proof
12. Prompt Library	Every module	40 prompts for everyday VA work

The **AI-Ready VA Toolkit** spreadsheet does the scoring, savings and pricing math that several of these templates refer to.

1. AI Use Agreement

A plain-language agreement between you and a client. It isn't legal advice: if the client is in a regulated field, or you want a binding contract, have it reviewed by a lawyer. You can attach it to your existing services agreement.

AI Use Agreement

Between: [Your name / business] ("the Assistant") and [Client business] ("the Client"). **Date:** [date]

1. Tools. The Assistant may use these AI tools for the Client's work: [e.g., Claude Team plan / ChatGPT Business / Microsoft Copilot]. Client work that uses the Client's data will run in an account owned by the Client: [account name / email]. The Assistant will use their own login with two-step verification.

2. Data AI may use. [e.g., email in the support@ inbox, the shared Google Drive folder "AI Reference," the project board, exported transactions with account numbers removed].

3. Data AI may not use. Passwords and login codes; full card or bank account numbers; tax or Social Security numbers; health information; [other confidential areas, e.g., HR files, legal matters, salaries]. Where a task needs a sensitive document, the Assistant will remove or replace the sensitive details first.

4. What AI may do. Read the data listed in section 2, and draft replies, documents, summaries and reports.

5. What always needs a person. Sending any email or message, posting anything publicly, making or approving any payment, deleting anything, and changing any customer record, until both parties agree in writing to change this for a specific workflow.

6. Review. [Name] reviews [which outputs] before they are used. The Assistant runs a review of every output for facts, promises, tone, privacy and flagged items.

7. Workflows and ownership. All AI workflows, instructions, files, SOPs and documentation built for the Client belong to the Client and stay in the Client's account if the working relationship ends. The Assistant may describe the work in an anonymized case study unless the Client says no here: [ ] No case study.

8. Problems. If an AI workflow produces an error that reaches anyone outside the business, the Assistant will pause the workflow and tell the Client the same day.

9. Pausing. Either party can pause or switch off any AI workflow at any time by telling the other.

Account settings checked on [date]: training on data [on/off/not applicable] · users with access [list] · two-step login [on] · connectors [list, read-only or read/write] · chat history and memory [setting].

Signed: _____ (Client) _____ (Assistant)

2. Client Data Rules

Print this, fill it in with the client, and keep it next to your desk.

[Client] Data Rules for AI

Never paste or upload:

- Passwords, login codes, API keys, security answers
- Card numbers, bank account numbers, tax or Social Security numbers
- Health or medical information about anyone
- [Client-specific: e.g., HR files, salaries, legal matters, investor details]

Strip before using: customer names (use "Customer A"), addresses, phone numbers, account numbers, anything not needed for the task.

Approved accounts: [tool and account] only. Never a personal account for client data.

Approved connectors: [list, and read-only or read/write].

Always a person: sending, posting, paying, deleting, changing customer records.

If something goes wrong: pause the workflow, tell [name] the same day, fix the cause, log it.

3. AI Opportunity Audit

Run this with the client in a 45 to 60 minute call, or in two shorter ones. Put the task list and scores in the Task Audit tab of the toolkit.

Part A: The business

1. What does the business sell, and to whom?
2. How many people work in it, and in what roles?
3. Which tools do you use for email, calendar, files, customers, projects, accounting and social media?
4. Do you already use any AI tools? Which ones, and for what?
5. Is there anything AI must never touch? (customers, data types, decisions)

Part B: Where the time goes

6. Walk me through a normal week. Where does the time go?
7. What do you do every week that you wish you never had to do again?
8. What falls through the cracks when you're busy?
9. What do customers wait too long for?
10. What reports, updates or documents do you produce every week or month?
11. What questions do customers or the team ask again and again?

Part C: For each top task (repeat for the top three to five)

12. Walk me through the last time this was done, step by step.
13. Where does the information come from?
14. What does a great result look like? Can you show me one?
15. What usually goes wrong?
16. What decisions are made along the way, and how?
17. Who sees the result, and what do they do with it?
18. What should never happen?
19. How long does it really take, and how often?

Audit summary (share with the client)

	Quick win	Big saver	The one you'll notice
Workflow	[name]	[name]	[name]
What it does	[one line]	[one line]	[one line]
Score	[x/15]	[x/15]	[x/15]
Hours saved per month	[x]	[x]	[x]
Value per month	[$]	[$]	[$]
Setup time	[days]	[days]	[days]

Total estimated value: [$/month], about [$/year].

Recommended next step: [e.g., an AI Setup Sprint covering all three workflows over three weeks for $X, which pays for itself in about Y months.]

4. Workflow Card

One page per workflow. Fill it in before you build; keep it updated after.

Workflow Card: [workflow name]

Client: [name] · **Built by:** [you] · **Date:** [date] · **Stage:** [Draft / Review / Spot-check / Exceptions]

1. Job: [one sentence: what it produces and how often]

2. Instructions: [paste the full standing instructions, or link to them]

3. Files: [each file, what it's for, and who keeps it up to date]

4. Connections: [tool, read-only or read/write]

5. Trigger: [on request / scheduled: day and time] · **Where the result appears:** [e.g., email drafts folder, shared doc, chat summary]

6. Check: [who reviews, what they look for, how long it takes] · **Never:** [hard limits]

Savings: before [x] min × [y] times a month · after [x] min including review · **[x] hours a month × $[rate] = $[value] a month**

Lives in: [account] › [project name] · **SOP:** [link] · **Change log:** [link]

5. Workflow SOP

SOP: Running and reviewing [workflow name]

Purpose: [one sentence]

Owner: [reviewer] · **Backup:** [name] · **Built and maintained by:** [you]

Where it lives: [account] › [project]. Log in with your own account.

When it runs: [schedule]. The result appears in [location] by [time].

How to review it:

1. Open [location].
2. Check facts: names, dates, prices, numbers, links.
3. Check promises: nothing commits us to anything not already approved.
4. Check tone: it sounds like us.
5. Check privacy: nothing goes to someone who shouldn't see it.
6. Resolve every [CHECK] or [NEEDS ANSWER] marker.
7. [Approve / send / file] it.

If it didn't run or looks wrong: [steps, e.g., run it on request with the same prompt; tell [you] the same day].

To pause it: [steps, e.g., turn off the scheduled task in Settings › Scheduled tasks].

Never: [the workflow's hard limits].

6. Change Log

Date	Workflow	What changed	Why	By
[date]	[name]	[e.g., added rule: don't mention delivery dates]	[e.g., two drafts promised dates we couldn't meet]	[you]

7. Monthly AI Report

AI Report for [client]: [month year]

Summary: Your AI workflows saved about **[x] hours** this month, worth about **$[value]**. [One sentence on the highlight.]

By workflow:

- [Workflow 1]: ran [x] times, saved [x] hours ($[value]). [one line on quality]
- [Workflow 2]: ran [x] times, saved [x] hours ($[value]). [one line]

What we improved: [from the change log, in plain language]

Issues and fixes: [honest and short, or "None this month."]

Next opportunity: [new workflow] would save about [x] hours a month ($[value]). I can set it up in [time] for [price / included in your retainer].

Year to date: [x] hours and $[value] saved.

8. AI Services Menu

AI services from [your business]

I help [type of business] save hours every week by setting up and running AI workflows safely, in accounts you own, with a person checking everything that goes out.

AI Opportunity Audit: $[price]
I map where your time goes, score every recurring task, and show you the three workflows that will save you the most, with the hours and dollars for each. One call, one clear page. Fully credited toward a Setup Sprint within 30 days.

AI Setup Sprint: from $[price]
I build, test and document two or three AI workflows over [two to four] weeks. Includes a written AI use agreement, a one-page card and SOP for each workflow, and a training session for your team.

AI Operations Retainer: from $[price]/month
I run and review your workflows, keep them up to date, send you a monthly report on what they saved, and add or improve one workflow every month.

Popular workflows: inbox triage and draft replies · meeting prep and follow-up · SOPs from your notes · social content from your long-form content · customer support drafts · bookkeeping prep · research briefs · weekly reports.

9. AI Setup Sprint Proposal

Proposal: AI Setup Sprint for [client]

What you told me: [two or three sentences in the client's own words about the problem, e.g., "You spend every Friday afternoon on the client report, and the support inbox takes an hour every morning."]

What I'll build:

1. [Workflow 1]: [what it does]. Saves about [x] hours a month.
2. [Workflow 2]: [what it does]. Saves about [x] hours a month.
3. [Workflow 3]: [what it does]. Saves about [x] hours a month.

Total estimated savings: about [x] hours a month, worth about $[value] a month ($[value] a year).

How it works:

- Week 1: sign the AI use agreement, set up the account and access, build workflow 1.
- Week 2: test workflow 1 on real work, build workflow 2.
- Week 3: build workflow 3, finish all cards and SOPs, 45-minute training for your team.

What you get: three tested workflows in your own account, a workflow card and SOP for each, the change log, and a first savings report.

Investment: $[price], [payment terms, e.g., 50% to start, 50% on handover]. At the estimated savings, it pays for itself in about [x] months.

After the sprint (optional): AI Operations Retainer at $[price]/month: review, maintenance, the monthly report, and one new or improved workflow every month.

To go ahead: reply "yes" and I'll send the agreement and first invoice. We can start [date].

10. Pitch Scripts

Script 1: Offer an AI audit to a current client (email or message)

Subject: An idea to save you time on [area]

Hi [name],

I've been training in setting up AI workflows for small businesses, and while working on your [area] I spotted a few places where AI could save you real time. For example, [specific task] could go from about [X] to [Y] a week.

Would you be open to a short AI audit of your [area]? I'd map where the time goes and show you the top three things worth automating, with what each would save. You decide from there.

It takes about [time] and costs $[price], which I'd credit toward setting anything up if you go ahead.

[Your name]

Script 2: Follow up after a week of no reply

Hi [name], just bringing this back to the top of your inbox. Even if now isn't the time for an audit, I'm happy to set up [the quick win] on its own. It would save you about [x] hours a month. Want me to go ahead?

Script 3: Mention it on a call

"Can I share something I noticed? You spend about [x] hours a week on [task]. I've been setting up AI workflows for this kind of work, with everything checked by a person before it goes anywhere. I think I could get that down to about [y]. Want me to put together a quick plan with the numbers?"

Script 4: Introduce AI services to a new prospect

Hi [name], I'm a virtual assistant who sets up and runs AI workflows for [type of business], things like [two relevant workflows]. For one client, [anonymized result, e.g., "a three-person agency"], that saved about [x] hours a month. If [their likely pain] eats into your week, I'd be glad to do a short audit and show you where AI would save you the most. Would that be useful?

Script 5: Present the audit results

> "Here's what I found. These three workflows would save you about [x] hours a month, which is roughly $[value] of your team's time. The quickest win is [workflow]; I can have it running in [days]. I've put together a sprint that builds all three in [weeks] for $[price], so it pays for itself in about [months]. Which of these would make the biggest difference to your week?"

Script 6: Propose the retainer at the end of a sprint

> "All three workflows are running and documented, and they're on track to save about [x] hours this month. AI tools change constantly, and the information they rely on goes out of date, so I recommend a monthly retainer: I review the workflows, keep them current, send you a monthly savings report, and add or improve one workflow each month. It's $[price] a month. Shall I set that up from [date]?"

---

11. Case Study

Case study: [headline with the result, e.g., "How a 4-person agency got Friday afternoons back"]

The client: [type of business, size, location if useful; anonymized if needed]

The problem: [what was taking too long, in the client's words if possible, with the before time]

What I built: [workflow name and what it does, in two or three sentences, without jargon]

How we kept it safe: [e.g., runs in the client's own account, read-only access to the inbox, every draft reviewed before sending]

The result: [hours saved per month, the dollar value, and any other benefit such as faster replies or fewer mistakes]

What the client said: "[quote, with permission]"

Want the same for your business? [link to book a call or your services menu]

12. Prompt Library: 40 prompts for everyday VA work

Use these inside a client project so the instructions and files are already there. Replace every [bracket].

Email and communication

1. **Reply drafter:** "Draft a reply to the email below in [client]'s voice, under [100] words. Answer only from the FAQ file. If something isn't covered, write [NEEDS ANSWER]."
2. **Tone fixer:** "Rewrite this email so it's [firmer / warmer / shorter] without changing the facts or promises. Show me the new version only."
3. **Difficult message:** "Help me write a polite but clear message to [person] about [late payment / missed deadline / scope creep]. Give me two versions: gentle and direct."
4. **Inbox summary:** "Summarize these emails into: needs a decision, needs a reply, FYI. One line each with sender and deadline."
5. **Thread catch-up:** "Read this email thread and tell me in five bullets where things stand, what was agreed, and what's still open."
6. **Template builder:** "Here are five emails I've sent answering [type of question]. Turn them into one reusable template with [brackets] for the parts that change."

Calendar and meetings

7. **Meeting brief:** "Write a 150-word brief for [client]'s meeting with [name] at [company]: who they are, our history from the attached emails, open items, and three talking points."
8. **Agenda:** "Create a [30]-minute agenda for a meeting about [topic] with [attendees], with time for each item and the decision we need at the end."
9. **Action items:** "From these meeting notes, list every action item with owner and due date. Mark any without an owner as [NO OWNER]."
10. **Follow-up email:** "Write the follow-up email from [client] to [name] after this meeting: thanks, the three agreed next steps, and the date of our next check-in."
11. **Scheduling reply:** "Draft a reply offering [person] these times: [times, time zone]. Short and friendly; ask them to pick one."

Documents and SOPs

12. **SOP from notes:** "Turn these notes into an SOP: purpose, when and who, what's needed, numbered steps starting with verbs, what done looks like, common mistakes. Mark gaps as [ASK]."

13. **Checklist:** "Turn this process into a checklist someone can tick off while doing it."
14. **Document cleaner:** "Tidy this document: fix headings, make the formatting consistent, shorten long sentences. Don't change the meaning or remove information."
15. **Summary for the boss:** "Summarize this document for [client] in five bullets and one recommendation, under 120 words."
16. **Onboarding guide:** "Using these SOPs, write a first-week guide for a new [role]: what to read, who to meet, and what to do each day."
17. **FAQ builder:** "From these customer emails, write an FAQ of the 10 most common questions with clear answers from our policy files. Mark answers you're unsure of with [CHECK]."

Research

18. **Prospect research:** "Research [company]. Give what they do, size, recent news, likely priorities, and a way [client] could help them, with a source link for every fact."
19. **Vendor comparison:** "Compare [vendor A, B, C] for [need] on price, key features, reviews and contract terms. Table plus a recommendation. Link every source."
20. **Event or venue shortlist:** "Find five [venues / events] in [location] for [purpose, dates, budget, size]. Table with name, price, capacity, link, and one pro and one con."
21. **Fact check:** "Check every fact in this text. For each, say whether you can confirm it with a source, and link it. Flag anything you can't confirm."

Social media and content

22. **Repurposer:** "Turn this [blog / video transcript] into 3 LinkedIn posts, 5 short posts and a newsletter intro, in [client]'s voice. No invented facts."
23. **Content calendar:** "Plan a month of posts for [client] around [themes], 3 a week. Table with date, platform, topic, hook and call to action."
24. **Caption writer:** "Write 5 caption options for this [photo/video description], under [40] words, in [client]'s voice, with [hashtag rule]."
25. **Hook improver:** "Give me 10 stronger first lines for this post. Make them specific, not clickbait."
26. **Comment replies:** "Draft friendly replies to these comments. Flag any complaint or question I should send to [client]."
27. **Newsletter draft:** "Draft this week's newsletter from these notes: subject line options, a short intro, three sections, one call to action to [link]."

Customer service

28. **Support reply:** "Draft a reply to this customer using only the policy and FAQ files. Under [120] words. Flag refunds, complaints or legal mentions at the top."

29. **Complaint response:** "Draft a calm, caring reply to this complaint that acknowledges the problem and offers [approved options only]. Don't admit fault or promise anything else."
30. **Feedback themes:** "Group this customer feedback into themes, count each, and give two example quotes per theme plus one suggested fix."
31. **Review reply:** "Draft a reply to this [positive / negative] review: thank them, address the specific point, under [60] words, no defensiveness."

Finance and admin prep

32. **Transaction categories:** "Categorize these transactions using [client]'s category list. Table with confidence; list low-confidence items with my question for the client. Don't change amounts."
33. **Invoice reminder:** "Write three payment reminders for invoice [#] for $[amount], due [date]: friendly at 3 days, firm at 14, final at 30. Professional throughout."
34. **Subscription audit:** "From these statements, list every recurring charge: vendor, amount, how often, and annual cost. Flag duplicates and anything unused for 60 days."
35. **Expense report:** "Turn these receipts into an expense report table: date, vendor, category, amount, purpose. Total by category."

Projects and reporting

36. **Weekly report:** "Write [client]'s weekly report from this data: wins, numbers vs last week, what's behind and why, decisions needed, next week's priorities. One page. Mark missing numbers [MISSING]."
37. **Project plan:** "Break [project] into phases and tasks with owners, durations and dependencies, as a table. Flag the riskiest step."
38. **Status update:** "Write a three-sentence status update on [project] for [client] from these notes: where it stands, any blocker, next step."
39. **Spreadsheet helper:** "Write a [Google Sheets / Excel] formula that [does what], and explain in one sentence how it works."
40. **Workflow finder:** "Here's a list of my recurring tasks for [client] with how long each takes. Which three are the best candidates for an AI workflow, and why? Score each on frequency, time, predictability, available information and risk."
