VIRTUALEXPERT.NET

The Inbox & Calendar Client Kit

Install inbox triage, meeting prep, meeting notes and a weekly review for a client, then sell it as a monthly care plan

DENISE CULLOM

Before you start

Every business owner you'll ever work with has the same complaint: the inbox runs their day. This kit gives you a complete, tested setup to fix that for a client, plus everything around the install that turns it into paid work: the pitch, the numbers, the intake, the tests, the handover and the monthly care plan.

It's written for virtual assistants, but it works the same for any freelancer or consultant who sets up AI for clients. If you've read *20 AI Agents That Pay for Themselves*, you'll recognize two of these agents. Here they're adapted for installing in someone else's business, with two new agents built around the calendar.

What this kit installs

Agent	What it does	Runs	Saves a month
Inbox Triage Agent	Sorts the inbox and drafts routine replies	Weekdays, 7:10am	10 hrs · $530
Meeting Prep Agent	Briefs the client on tomorrow's meetings	Weekdays, 4:10pm	5 hrs · $265
Meeting Notes Agent	Turns transcripts into notes, tasks and a follow-up	After each meeting	8 hrs · $424
Weekly Review Agent	Finds open loops and next week's clashes	Fridays, 2:10pm	3 hrs · $159

*Total for a typical small business: **about 26 hours and $1,378 a month**, with review time already subtracted. How the numbers are worked out is in Part 1.*

Who to sell it to

- **Owners and executives with 100+ emails a day** who spend their first hour sorting instead of working.
- **Coaches, consultants and agency owners** who live in back-to-back calls and lose track of what they promised.
- **Your existing admin clients.** If you already manage their inbox by hand, this lets you do it in half the time and take on more clients, or charge for a higher-value service.

What you need before you start

- **Your own paid Claude or ChatGPT account** to practice on. Build every agent once for yourself before you install it for a client.
- **The client on their own paid plan** (about $20 a month for one person). The agents, files and connections live in the client's account, not yours, so they keep working if you part ways and the client's data never sits in your account.
- **Permission to connect the client's email and calendar** to their AI account (Gmail and Google Calendar, or Outlook).

How to use this kit

1. **Part 1, Sell it:** the pitch, the savings worksheet, what to charge and a proposal email.
2. **Part 2, Intake:** the questions to ask, the access to request and the safety rules to agree in writing.
3. **Part 3, Install:** 4 agents, each with instructions to paste, files to collect, connections and a scheduled task.
4. **Part 4, Test:** the checks to run before the client sees anything.
5. **Part 5, Hand it over:** a client-facing guide and a 20-minute handover call.
6. **Part 6, Keep it running:** a weekly care checklist, a 30-day results report and what to sell next.

Every agent works in Claude or ChatGPT. Where the steps differ, both are shown. Fill in every [bracket] before you paste anything.

The one rule

Agents draft. People approve. No email is sent and no calendar invite is accepted, declined or moved until the client (or you, if that's agreed) has read it. You can loosen this later for one agent at a time, once it has a clean record (Part 6 shows how).

Part 1: Sell it

The 30-second pitch

Script: The pitch

"You told me your inbox eats the first hour of your day. I can set up an AI assistant in your own account that sorts your email every morning, drafts the routine replies for you to approve, briefs you on tomorrow's meetings and writes up your calls. Nothing gets sent without you. Most owners get back five to seven hours a week. Setup takes about a week, and I look after it every month so it keeps getting better."

Work out their numbers

Clients buy time and money, not AI. Ask how long each job takes today, then fill in this worksheet with them on the call. The figures below are for a typical small business; replace them with the client's own.

Job	Minutes by hand	Minutes to review	Times a month	Rate	Saved a month
Sort and answer routine email	45 a day	15 a day	20	$53	10 hrs · $530
Prepare for tomorrow's meetings	20 a day	5 a day	20	$53	5 hrs · $265
Write notes and follow-ups	20 a meeting	5 a meeting	32	$53	8 hrs · $424
Friday open-loop review	60 a week	15 a week	4	$53	3 hrs · $159

$53 an hour is the cost of an executive assistant: $36.82 median pay plus benefits. Rates are U.S. median pay from the Bureau of Labor Statistics (May 2025) divided by 0.70 to include benefits and payroll taxes. If the owner does the work themselves, their time is worth more, so use their number.

Savings math

Hours saved a month = (minutes by hand − minutes to review) × times a month ÷ 60

Monthly savings = hours saved × hourly rate

For this kit: about 26 hours and $1,378 a month. Faster replies to clients and fewer missed follow-ups aren't counted, but they're often what the client notices first

What to charge

Charge for the result and the risk you take off the client's plate, not your hours. A fixed setup fee plus a monthly care plan works best: the client knows the price up front, and you get paid to keep the agents improving.

	Suggested starting range	What it covers
Setup	$450 to $900	Intake, install of all four agents, testing, client guide, handover call
Monthly care	$150 to $300 a month	Weekly checks, fixes and updates, monthly results report
Smaller start	$250 to $400	Inbox Triage only, as a paid trial that rolls into the full setup

These are starting points, not market rates. Set your own based on your experience, the client's size and how much the work saves them. A good test: the setup fee should pay for itself in under three months of savings.

The proposal email

Template: Proposal email

Subject: Getting your mornings back: inbox and calendar setup

Hi [first name],

Thanks for walking me through [the job, e.g., sorting your email and prepping for meetings]. From what you told me, it takes about [hours] hours a month, which costs roughly $[amount] at [rate].

Here's what I'd set up: four AI agents in your own account that sort your inbox every morning and draft routine replies, brief you on tomorrow's meetings each afternoon, turn call transcripts into notes and follow-ups, and run a Friday review of anything still waiting on you.

Setup: $[fee], one time. Done within [5 to 10] business days of getting access.
Monthly care: $[fee] a month. I check the agents every week, fix what needs fixing, update them as your business changes, and send you a short results report each month. Cancel any time with 30 days' notice.

Everything is built in your own [Claude / ChatGPT] account, so you own it. Nothing gets sent to anyone without a person approving it first.

If that works for you, reply "yes" and I'll send the invoice and a short intake form.

[Your name]

Part 2: Intake and access

Send the intake form as soon as the client says yes. Most installs that go wrong go wrong here: missing files, the wrong account or unclear rules.

Intake questionnaire

Send these as a form or a shared document. The first five are the same for every kit.

1. Which AI tool and plan do you use, or should we start one? (Claude Pro or ChatGPT Plus is enough to start.)
2. Which email, calendar and file storage do you use? (Gmail, Outlook, Google Drive, OneDrive, Dropbox.)
3. Who on your team will review what the agents draft, and how quickly can they usually do it?
4. Describe your business in two sentences: what you sell and who buys it.
5. Share three emails or posts you wrote that sound exactly like you.
6. Who are your VIPs: the 5 to 10 people or companies whose emails always come first? Any keywords that always matter (e.g., "invoice," "contract," "urgent")?
7. What questions do you answer by email again and again? List up to 10 with your usual answer.
8. Which meetings should the meeting briefs skip (recurring internal calls, personal blocks)?
9. Which note-taker or video tool records your calls, and where do the transcripts end up?
10. What should never get a drafted reply (e.g., anything from your lawyer, your bank, or family)?
11. What does a good day look like: how many hours of meetings is too many?

Access checklist

Ask the client to invite you, never to send you their password. Where a tool allows it, get your own login with only the access you need.

- ☐ The client's AI account: a seat on their Team plan, or a screen-share session where they log in and you drive.
- ☐ Email connected to the client's AI account (they click Connect and approve it themselves).
- ☐ Calendar connected the same way.
- ☐ Access to the folder where meeting transcripts are saved, if they use one.
- ☐ A shared folder (Google Drive or OneDrive) called "AI agents" for the reference files in Part 3.
- ☐ A written yes to the safety rules below.

Safety rules to agree in writing

Put these in your proposal or send them as a short email and ask the client to reply "agreed." They protect the client and they protect you.

Template: Safety rules

1. Agents draft; a named person approves before anything is sent, posted, paid or deleted.
2. The agents and their files live in [client]'s account. [VA name] can be removed at any time.
3. These are never pasted into an AI tool: passwords, full card or bank account numbers, Social Security or tax ID numbers, medical records, or anything a contract says to keep confidential.
4. Paid AI plans let you turn off use of your chats for training. We'll check that setting on day one.
5. No email is sent, archived or deleted by an agent. Calendar events are never accepted, declined, moved or created by an agent.
6. Emails about money, contracts, complaints or legal matters are flagged, never drafted.

Agreed by [client name], [date].

Check the privacy setting on day one. In Claude, open **Settings** → **Privacy**; in ChatGPT, open **Settings** → **Data controls**. Turn off the option that lets the provider use chats to improve its models, if the client's plan shows one. Names of menus change often; if you can't find it, ask the assistant "Where do I turn off training on my chats?"

Part 3: Install

Every agent below is built from the same four parts: a **project** (one home for one job), **instructions** (its job description), **files** (its training binder) and, for recurring work, a **schedule**. Connected apps are the fifth part for agents that need them.

The build steps, once

In Claude: Projects → Create project → name it → paste the instructions under Instructions → upload the files → start a chat and give it one small real task. To schedule a task, type in any chat "Every weekday at 7:10am, do the following..." and approve the task Claude proposes, or create it from the Scheduled section.

In ChatGPT: New project → name it → paste the instructions in the project's settings → add the files → test it. To schedule, type "Every weekday at 7:10am, do the following..." and confirm the card, or use the Scheduled section. Two limits to plan for: Plus allows a handful of active scheduled tasks at once, and a scheduled task may not be able to read a project's uploaded files, so every task prompt in this kit is written to stand on its own.

Set scheduled times a few minutes past the hour (7:10, not 7:00) and run each task once by hand before you trust the schedule. Menus get renamed often; if a button isn't where this kit says, ask the assistant where it went.

Install order: Inbox Triage first, then let it run for three days before you add Meeting Prep. Meeting Notes can go in any time. Add the Weekly Review last, on a Friday.

Agent 1: Inbox Triage Agent

Runs: Weekdays, 7:10am · **Needs:** email connector (Gmail or Outlook) · **Install time:** 45 minutes

What it does: Reads the last day's email, sorts it into "needs you today," "can wait" and "ignore," and drafts replies to routine messages in the client's voice, so the client starts the day with a short list instead of a full inbox.

1. Create a project called "Inbox Triage Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Inbox Triage Agent**
>
> You manage the inbox for [client name], [role] at [business], which [one line on what the business does].
>
> **Sort every email into:** (1) Needs [name] today: clients, deadlines, money, decisions. (2) Can wait: internal updates, vendors, scheduling. (3) Ignore: newsletters, promotions, notifications.
>
> **Always flag:** [VIP senders and keywords from intake question 6].
>
> **Draft replies to routine emails** in [name]'s voice: [3 voice rules from the sample emails, e.g., warm, short, signs off "Best, Sam"]. Use the FAQ file for answers. If you don't know an answer, write [NEEDS ANSWER] in the draft rather than guessing.
>
> **Never** reply about money, contracts, complaints or anything legal. Flag those instead. Never send or delete anything. Drafts only.

3. Upload: the client's FAQ (or the list of common questions from intake question 7), the three sample emails, and the VIP list.

4. Connect: the client's email. In Claude, also connect the calendar so it can draft "are you free Thursday?" replies with real times.

5. Put it on a schedule:

> **Scheduled task: Morning inbox sweep · Weekdays, 7:10am**
>
> **Job:** Triage [name]'s inbox and draft routine replies. **Read:** emails received in the last 24 hours (72 hours on Mondays). **Steps:** (1) Sort into Needs you today, Can wait, Ignore. (2) Flag anything from [VIP list] or about money, contracts or deadlines. (3) Create a draft reply for each routine email in the drafts folder, signed "[sign-off]". Mark anything uncertain [NEEDS ANSWER]. **Deliver:** a summary with the Needs you today list first, one line each: who, what, by when. **Never** send, post, delete or change anything. If something you need is missing, say exactly what's missing and stop.

Watch for: drafts that sound too formal. Add the client's own phrases to the voice rules. If the email connector can't create drafts in the client's account, have the summary include the draft text instead.

Agent 2: Meeting Prep Agent

Runs: Weekdays, 4:10pm · **Needs:** calendar and email connectors · **Install time:** 30 minutes

What it does: Every afternoon, looks at tomorrow's calendar and writes a short brief for each meeting: who's coming, what was last said by email, what the client needs to bring or decide, and any scheduling clashes.

1. Create a project called "Meeting Prep Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Meeting Prep Agent**
>
> You prepare [client name] for tomorrow's meetings at [business].
>
> **For each meeting on tomorrow's calendar,** write: (1) time, title and attendees, with each person's company and role if you can find it in past email; (2) the last email exchange with them in two lines; (3) anything [name] promised to send or decide; (4) one suggested goal for the meeting.
>
> **Flag:** double bookings, meetings with no video link or address, meetings within 15 minutes of each other, and any meeting where an attendee hasn't accepted.
>
> **Skip:** [recurring internal meetings or personal blocks to ignore, from intake question 8].
>
> Keep each brief under 80 words. Never accept, decline, move or create a calendar event. Never email attendees.

3. Upload: a short list of key clients and partners with one line on each, if the client has one.

4. Connect: calendar and email.

5. Put it on a schedule:

> **Scheduled task: Tomorrow's meeting briefs · Weekdays, 4:10pm**
>
> **Job:** Brief [name] on tomorrow's meetings. **Read:** tomorrow's events on [name]'s calendar, and email with each attendee from the last 60 days. **Steps:** (1) List each meeting with time, attendees and their company. (2) Summarize the last exchange with them in two lines. (3) List anything [name] promised or needs to decide. (4) Flag clashes, missing links and unaccepted invites. Skip [meetings to ignore]. **Deliver:** one brief per meeting, under 80 words each, in time order. **Never** send, post, delete or change anything. If something you need is missing, say exactly what's missing and stop.

Watch for: briefs padded with guesses about people. If the agent can't find an attendee in past email, it should say "no past email found," not invent a job title.

Agent 3: Meeting Notes Agent

Runs: After each meeting · **Needs:** a meeting transcript (Zoom, Teams, Meet or any note-taker) · **Install time:** 20 minutes

What it does: Turns a raw transcript into a summary, decisions, an action list with owners and dates, and a ready-to-send follow-up email.

1. Create a project called "Meeting Notes Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Meeting Notes Agent**
>
> When [client name] or [VA name] pastes a meeting transcript or rough notes, produce:
>
> 1. **Summary:** 3 to 5 bullets.
> 2. **Decisions:** one line each. If none were made, say so.
> 3. **Action items:** a table with Task, Owner, Due date. If an owner or date wasn't said, write UNASSIGNED or NO DATE. Never guess a date.
> 4. **Open questions.**
> 5. **Follow-up email** to the attendees, under 150 words, in [name]'s voice.
>
> Our team: [names and roles]. Key clients: [names].

3. Upload: the team list and one past meeting summary the client liked, if they have one.

4. Connect: nothing required. If the client's note-taker saves transcripts to Google Drive or OneDrive, connect that folder so they can say "notes for today's 2pm call."

Watch for: action items. That's where an error costs money. Check every owner and date against the transcript for the first two weeks.

Agent 4: Weekly Review Agent

Runs: Fridays, 2:10pm · **Needs:** email and calendar connectors · **Install time:** 30 minutes

What it does: Every Friday, finds the emails still waiting on the client, the threads where someone hasn't replied to them, and next week's calendar problems, so nothing slips over the weekend.

1. Create a project called "Weekly Review Agent" in the client's account.

2. Paste these instructions:

> **Instructions: Weekly Review Agent**
>
> You run [client name]'s Friday review at [business].
>
> **Find and list:** (1) emails from the last 14 days that [name] hasn't replied to and that look like they need a reply; (2) emails [name] sent in the last 14 days that asked a question and got no answer; (3) next week's calendar: total meeting hours, days with more than [5] hours of meetings, clashes, and days with no focus time.
>
> For each open loop, suggest one next step: reply, nudge, delegate to [VA name], or drop it.
>
> Keep it to one screen. Never send, accept or change anything.

3. Upload: none.

4. Connect: email and calendar.

5. Put it on a schedule:

> **Scheduled task: Friday review · Fridays, 2:10pm**
>
> **Job:** Run [name]'s weekly review. **Read:** email from the last 14 days and next week's calendar. **Steps:** (1) List emails waiting on [name]'s reply. (2) List emails [name] sent that got no answer, with a suggested two-line nudge for each. (3) Summarize next week: meeting hours by day, clashes, overloaded days. **Deliver:** three short lists, open loops first, each with a suggested next step. **Never** send, post, delete or change anything. If something you need is missing, say exactly what's missing and stop.

Watch for: noise. If the list gets long, narrow it to clients and named contacts only, and add newsletter senders to an ignore list.

Part 4: Test before handover

Run every test in the client's account, with their real data, before the handover call. Fix and re-run anything that fails. Keep this table: it goes in your 30-day report as proof the work was checked.

Test	How to run it	Pass if
Inbox sort	Run the morning sweep by hand on yesterday's email	Every VIP email is in Needs you today; no client email is in Ignore
Draft voice	Read five drafts with the client's sample emails beside them	You'd send at least four with light edits
Sensitive email	Find a recent email about money or a contract	It's flagged, with no draft
Meeting brief	Run tomorrow's briefs and check one against the real email history	Facts match; unknown attendees are marked, not guessed
Action items	Run one real transcript through Meeting Notes	Every owner and date appears in the transcript
Missing information	Give an agent a task with one key fact left out	It says what's missing and stops instead of guessing
Nothing goes out	Check sent mail, posts and records after every test	Nothing was sent, posted, changed or deleted

If the same fix comes up twice, add a rule to that agent's instructions. Agents get better from written rules, not from being told off in a chat.

Part 5: Hand it over

The client guide

Copy this into a one-page document, fill it in and save it in the client's "AI agents" folder. It's the page they'll open when you're not there.

> **Client guide: Your inbox and calendar agents**
>
> **What's running:** an inbox sweep every weekday at 7:10am, meeting briefs every weekday at 4:10pm, a Friday review at 2:10pm, and a Meeting Notes project you paste transcripts into after calls.
>
> **Your daily routine (about 15 minutes):** open the morning summary, handle the Needs you today list, then open your drafts folder and send, edit or delete each draft. In the afternoon, skim tomorrow's briefs. After a call, paste the transcript into Meeting Notes and send the follow-up it writes.
>
> **What the agents will never do:** send, post, pay, delete or promise anything without a person approving it.
>
> **When something looks wrong:** don't fix it in the chat. Forward it to [VA name] at [email] with one line on what you expected. I'll update the instructions so it doesn't happen again.
>
> **To pause everything:** turn off the scheduled tasks under Scheduled in your AI account. Nothing else breaks.
>
> **Your monthly report** arrives on the [date] of each month with time saved, what changed and what's next.

The 20-minute handover call

Book it for the morning, when the first scheduled run has just landed, so you can walk through real output.

Minutes	What to do
0 to 3	Recap the problem in their numbers: "This was costing you about [hours] a month."
3 to 10	Open this morning's output together. Show where each agent's work lands and what to do with it.
10 to 15	Have the client approve, edit and send (or post) one item themselves while you watch.
15 to 18	Walk through the client guide: what never happens, what to do when something looks wrong, how to pause.
18 to 20	Agree the first check-in date and when the monthly report arrives.

After the call, send the client guide by email so it's in their inbox, not just their drive.

Part 6: Keep it running

Weekly care checklist (20 to 30 minutes per client)

- ☐ Every scheduled task ran this week. Open each one's history and look for skipped or failed runs.
- ☐ Connections are still signed in. Expired sign-ins are the most common reason an agent goes quiet.
- ☐ Read a sample of ten drafts. Anything the client rewrote becomes a new voice rule.
- ☐ Check that no email from a VIP landed in Ignore.
- ☐ Update the VIP list and the meetings-to-skip list with any changes.
- ☐ Every fix the client or reviewer made twice this week is now a written rule in the instructions.
- ☐ Reference files are current (prices, policies, team list, dates).

The 30-day results report

Send this at day 30 and every month after. It's the single best way to keep a care plan: clients cancel what they can't see.

> **Prompt: Monthly results report**
>
> Write a one-page monthly results report for [client], whose inbox and calendar agents I set up and maintain. Use a friendly, plain tone.
>
> Here's what happened this month: [paste counts, e.g., emails sorted, drafts created, drafts sent with no edits, meetings briefed, transcripts summarized]. Here's what I changed or fixed: [list]. The client's time per task before was [minutes] and is now about [minutes].
>
> Include: (1) one headline sentence with hours and dollars saved this month, using a rate of $[rate]/hour; (2) a short table of each agent, what it handled and time saved; (3) what I improved; (4) one recommendation for next month, with its estimated savings. Don't invent numbers I didn't give you. Under 300 words.

Earn autonomy in stages

After four clean weeks, the client may want the inbox agent to file newsletters into a folder automatically, or Meeting Notes to send the follow-up email to internal attendees only. Loosen one thing at a time, and never for anything involving money, contracts or external clients. Write the change into the instructions and the client guide, and agree it with the client by email first.

What to sell next

Clients who like this kit usually want help with what the inbox is full of. If it's customer questions, sell the **Customer Support Kit**. If it's invoices and receipts, sell the **Bookkeeping Prep Kit**. If the meeting notes keep mentioning content and marketing, sell the **Social Content Kit**.

The other client kits

This kit is one of four Done-for-You Client Kits for VAs: **Inbox & Calendar**, **Social Content**, **Bookkeeping Prep** and **Customer Support**. Each one follows the same six parts, so once you've installed one, the next goes faster. Get the others at **virtualexpert.net/kits**.

Want a new client-ready workflow every month? The **AI VA Lab** membership adds one at the start of each month, with ten prompts and the client-facing templates to sell it: **virtualexpert.net/membership**.
